Curriculum • SIMS • Consulting

Curriculum

- SimMedical curriculum incorporates higher education learning assessment tools to promote outstanding improvement and achievement in the health care industry.
- SimMedical's curriculum development process applies the expertise of simulation based training with the content and knowledge of leading subject matter experts to create courses which meet constantly evolving health care needs.

Simulation Information Management System (SIMS)

- Incorporates three management systems for effective and efficient operations of your simulation center:

- Learning Management System (LMS)
- Research and Data Management System (RDMS)
- Facilities Management System (FMS)

Consulting and Advisory Services

- SimMedical consulting services are customized to meet the needs of all customers.
- Services include but are not limited to:
 - Needs Assessment
 - Simulation Center Design
 - Build Out/Operational Excellence
 - Operations and Professional Instructor Training
